

Motorsport to Marine Members' Visit to

MIA Attendee List
Tuesday 15 September
Southampton

HOSTS:

Motorsport Industry Association (MIA) www.the-mia.com

Chris Aylett – CEO

Tracy Dewhurst – Project Manager

The Motorsport Industry Association (MIA) is the global trade association serving motorsport's high performance engineering, tuning and services industry. Founded in 1994, the MIA now has well over 300 UK and international members. It assists business development in many ways, through providing information, opportunities, assistance and constant encouragement.

ATTENDEES:

Autocar Electrical Equipment Co Ltd www.autocar-electrical.com

Mike Ford – Managing Director

Mrs B Ford – Marketing Co-ordinator

Manufacturers and distributors of Lumenition and MicroDynamics performance products. Lumenition offers a range of advanced ignition solutions and accessories for a wide variety of performance and classic applications. Micro Dynamics' race products include the versatile Digital Series of shift lights and rev limiters, and advanced analogue engine control systems.

Chris Tullett Exhausts www.christullettexhausts.com

Chris Tullett – Director

Andy Tullett – Director

Design, development and fabrication of exhaust systems in stainless steel, inconel and titanium. Specialise in one-off applications and small batches. Chris and his team have extensive experience at all levels of motorsport up to and including F1.

Cosworth Electronics Ltd www.cosworth.com

Simon Holloway – Business Development Manager

Cosworth Electronics (formerly Pi Research) specialises in providing data acquisition, data analysis and control capabilities (including chassis, engine and payload) in highly reliable, compact designs that are able to withstand arduous environmental conditions. Technologies to deliver on-board data reduction and real time telemetry, combined with

the class-leading Pi Toolbox analysis software, have led to the Pi Research range of data acquisition and chassis control solutions and the Pectel range of control systems being employed in applications throughout a variety of markets including aerospace, defence, marine and motorsport.

Delta Motorsport Ltd www.delta-motorsport.com

Simon Dowson – Managing Director

Delta Motorsport brings together innovative design, creative production solutions and skilled project management.

A committed team of design and production engineers, with a broad range of experience, can take a project from a concept, through design, prototype and development to a finished product.

Delta's deeply rooted background in high performance engineering and it's depth of knowledge and experience sets the company apart from so many other engineering consultancies.

Delta is currently completing a project that is providing cutting edge solutions in low cost lightweight structures, electric drive and hybrid power solutions. All of which would be applicable to the Marine Industry.

Eltro GB Ltd www.eltro.co.uk

Jeremy Cockrem – Managing Director

Plasma nitriding of engine and chassis parts.

The ELTROPULS process is an environmentally friendly nitration process, which is easy on resources and provides protection of components and tools against wear, corrosion and for increased strength.

Eltro has provided the advantages of plasma treatments for more than 25 years and our aim is to provide a tailor-made solution for every customer.

EM Motorsport www.emmotorsport.com

Christiana Pace – Sales & Marketing Manager

EM Motorsport Ltd operates within the Motorsport industry on every level: from club racing to Formula One, motorbikes, touring cars, DTM, GP2, F3 and power boat offering the following but not exhaustive product/service;

- FIA homologated LED Marshal flag and Race Control Management system
- Highly qualified race engineer for track support
- FIA approved circuit start light panels, enclosure for start lights and pit lane etc
- Electronic equipment for BOAT racing (OFFSHORE, POWERBOAT)
- GPS based systems
- Image acquisition and distribution technology
- Accident data recorder (FIA homologated)
- F1 Marshalling system

Global TCT Ltd www.globaltct.com

Kevin Smith – Technical Director

Global TCT are market leaders in rapid manufacturing using advanced, unique in-house processes to provide high integrity, complex, metal and plastic cast components that no other manufacturing route can replicate. We specialise in rapid production in days, maximising component functionality, weight saving, strength and heat dissipation.

Manufacturing functional models for architects or concept approval, fully finished specialised metal cast components in automotive, defence, historic interests, bespoke architectural ironmongery, film and achievement awards.

Goodridge www.goodridge.net

Andy Cobbold – OEM Commercial Manager

Goodridge is the World's Leading Supplier of Hoses & Fittings, celebrating 35 years of supplying the highest quality products to the automotive and racing industry. Our brake lines and flexible hoses have been tested and proven in the most demanding environments worldwide, and our reputation has been built on providing superior performance time after time. We guarantee superior quality, rapid delivery and reliability whether the application is high volume manufacture, motorsport, specialised industrial, or general road use.

Our brake hose and fluid transfer systems are sold worldwide into the highest levels of racing, and - F1, IRL, NASCAR, World Rally Car, Sportbike, Drag Racing, Custom Motorcycle - and OEM applications for automotive, motorcycle, marine, snowmobile or ATV.

Good Fabs www.goodfabs.com

Neil Morgan – Managing Director

Good Fabs is a fabricator of racing exhausts and a manufacturer of tube and custom bends. We have been working for motorsports teams and racing enthusiasts since 1984. We employ a team of skilled fabricators and welders, tube manufacturers and tube benders to make every part of a performance exhaust system. We fabricate and weld sets of primaries, merge collectors, tailpipes, silencers and megaphones for F1, LMP, World Rally Car and NASCAR teams as well as for enthusiast race categories such as Caterham and historic Mustangs.

We help racers maximise power, minimise weight, withstand high temperatures, make exhausts last longer or simply sculpt a system around the engine and chassis position.

For production jobs we also use our up-to-date CAD systems to interpret models and design jigs without needing the car or an existing exhaust system to work from.

Gordon Bruce Associates www.gordonbruce.com

Gordon Bruce – Managing Director

Gordon Bruce Associates is one of Europe's foremost automotive marketing communication consultancies, with over 25 years' experience of media relations, advertising, newsletters and other publications, general design and print, and brand enhancement.

Current clients include: Delivered On Time; Duncan Hamilton; H&H Classic Auctions; Institute of Advanced Motorists; IAM Fleet; Kumho Tyres; Motorsport Industry Association; Motorsport Safety Fund; Ontime Automotive; Paramount Performance; Windrush Garage.

Jonathan Lee Recruitment Limited www.jonlee.co.uk

Jonathan Lee – Chairman

With offices in Wakefield, Leicester, Stourbridge, St. Albans and Basildon supported by overseas recruitment partners Jonathan Lee Recruitment has been providing a specialist recruitment service to the international engineering and manufacturing industries for over 30 years. We resource, contract and fill permanent roles up to senior management level in engineering, manufacturing, purchasing and supply chain and finance. Key industries include automotive, aerospace, defence, marine and rail.

Our industry-experienced consultants provide “*Solutions Through Understanding*”.

Keltie www.keltie.com

Sean Cummings – Partner
Laura Wade – Business Development Manager

Keltie is a firm of UK and European patent and trade mark attorneys based in central London. We represent clients to identify, establish, protect, exploit and enforce their intellectual property rights globally. Our patent expertise covers a range of technologies including automotive and electromechanical engineering.

Lola Cars International Ltd www.lola-group.com

Robin Brundle – Managing Director
Ian Moreton – General Manager

Lola Group is one of the oldest and most successful constructors of racing cars in the world.

After celebrating its 50th anniversary in 2008, Lola is still at the forefront of design, technology with a state of the art facility including a 50% scale windtunnel at its base in Huntingdon, Cambridgeshire.

Having won all there is to win in motorsport, from the Formula Ford Festival to a World Championship Grand Prix, Lola now also service the Aerospace, Marine, Automotive, Defence and Communications industries with a complete carbon fibre design and build capability

2009 racing programmes for Lola include models in the LMP1 and LMP2 class (both open and closed cockpit versions) of the Le Mans and American Le Mans Series, as well as a range of World Junior car single seaters and the famous Lola T70 official Continuation series.

Menard Competition Technologies (MCT) www.mctuk.com

Charlie Bamber – Commercial Director

MCT UK are a leading edge engineering service company specialising in the design, engineering and manufacture of high performance engines through to the construction of performance vehicles and specialist composite components. Expert knowledge from design to validation combined with the simplified core working practices identified within our ISO9001 approved quality system offer “fast track” results.

Minister Racing Engines Ltd www.minister-power.com

Graham Fuller – Director

Manufacturers of high performance engines for track and road. Also offering build, preparation and service for competition and high performance vehicles.

Oerlikon Balzers Coating UK Ltd www.oerlikon.com

Andy Bloyce – Technical Manager, Motorsport

Oerlikon Balzers are the worldwide leader in PVD and PACVD coatings for friction and wear reduction. With dedicated production facilities and staff for component coating in the UK and around the world, their coatings produce significant improvements in wear and friction with enhanced corrosion protection for engine, transmission, hydraulic and other mechanical systems.

Old Hall Performance Ltd www.oldhallperformance.com

email: info@the-mia.com
web: www.the-mia.com

Old Hall Performance has been created to offer high quality automotive performance products from North America to the European Market.

Established in 2005 by people who have passion, a wealth of experience and an in-depth understanding of the high performance automotive market, Old Hall Performance supplies and distributes market leading products, such as Red Line Synthetic Oil and Macs Custom Tie Downs.

OPEN MIND Technologies UK Ltd www.openmind-tech.com

Ken Baldwin – Business Development Manager
Fiona Youell – Sales Executive Assistant

OPEN MIND Technologies AG develops CAD/CAM solutions used by companies to speed up, streamline and increase the efficiency of their production processes. As technological leader on the digital production market, our products convert digital models into optimised NC milling and NC milling/turning programs for machine tools.

Our customers worldwide have many advantages over the competition. By using OPEN MIND solutions, companies ranging from tool, mould and machine makers, to automotive and aerospace firms, as well as energy providers, jewellery, watch and medical implant makers are able to create top-quality models, prototypes and tools. And the list of industries we serve grows daily.

Precision Technologies International Ltd (P.T.I.) www.ptilttd.co.uk

Brian Pinfield – Managing Director

Precision Technologies International Limited (P.T.I.) is a specialist component, tool and gauge manufacturer.

High precision components are manufactured for a number of industries, the largest sector being in motorsport and aerospace markets. Parts are produced to very tight limits including transmission components, engine gears, pump parts and drive shafts. Whether production runs, development or prototype, P.T.I. gives unrivalled quality and first class service.

Tooling is manufactured for all metal forming operations, including pressing, extrusion, rotary forging, orbital forging and metal powder compacting, swaging, squeeze forming, and hot, warm and cold forging. The Company has first class plant and equipment, including nine spark-erosion, and four wire-erosion machines. The very latest CAD/CAM facilities, incorporating full 3D modelling, with DNC links, are installed and used.

The Company is ISO 9001 registered and has a large number of customer approvals.

Ricardo UK Ltd www.ricardo.com

Dave Morrison – Business Development Manager
Stuart Fedden – Business Development

Ricardo is the largest transmission engineering and design consultancy in the UK. The combination of key technologies from both motorsport and mainstream automotive applications has enabled development of cutting edge capability. This philosophy and “right first time” approach has resulted in an enviable track record in all forms of competition at the highest levels.

Ricardo transmissions have been used by winning teams in virtually all forms of Motorsport. This encompasses bespoke design and supply of transmissions for 4WD World Rally Cars, Formula 1 and single source supply transmissions to race series such as the Renault World Series and Indy Pro Series.

Specialist Composite Solutions Ltd www.scsolutions-ltd.com

email: info@the-mia.com
web: www.the-mia.com

SC Solutions has established itself as a composite leader in the motorsport arena. In 2009 SC Solutions will continue to officially support the A1GP World Cup of Motorsport as well as offer composite training and high-quality repair at its Oxfordshire facility.

Composites aren't a "black art"; they're a scientific process that requires knowledge and operator skill. Technicians at SC Solutions are well-trained in aerospace-certified levels composite repair and put forth the highest possible quality repair work. And not just that -- we're interested in sharing the knowledge, too, through our composite training courses. Watch the video on the left-hand side of this page for a preview of what we can teach you.

Stack Ltd www.stackltd.com

Alan Rock – Managing Director

Stack is a world-leading supplier of instruments, data-loggers and video systems with over 25 years of proven experience and service.

Stack's range for recreational and commercial boating are designed for the maximum in reliability, robustness and quality, proven under the harshest conditions.

Our solutions for the marine industry include a selection of gauges and intelligent instruments that combine microprocessor control with high-precision stepper-motor technology to provide superior accuracy and reliability.

Products also include sophisticated multi-function data and video-logging solutions, integrated displays and powerful yet easy-to-use data analysis software.

For video, we offer solid-state, ruggedized DVRs with line-up of models that offer completely sealed units to IP67, extended operating temperature ranges, extended recording capacity and higher bit-rates including up to 40 Mbps for video professionals.

Willans www.willans.com

Simon Perkins – Managing Director

Willans® have been leaders in driver safety since 1967. Specializing in high quality cost effective harnesses for all forms of Motorsports. We supplied harness to Virgin Challenger for the Transatlantic record as well as many other powerboat applications from our ISO 9000 facility. We provide off the shelf products as well as custom tailored solutions.

Wirth Research Ltd www.wirthresearch.com

Tim Cunningham – Group Managing Director
Simon Crompton – Commercial Consultant

Wirth Research is an innovative engineering group, specialising in research, development, design and manufacture for the motor racing industry and other high technology applications. The company, formed in 2003, received a Queen's Award for Enterprise in 2008. Its sister company Digital Flow Solutions is an aerodynamic/thermodynamic solutions company providing innovative answers to complex problems through the application of Computational Fluid Dynamics (CFD). Carbon composite coatings.
